

GEISERMISER

Save Water When Sprinklers Break

Product Fact Sheet

Introducing the GeiserMiser[®], a self-resetting sprinkler shut-off valve that **automatically stops** broken sprinklers and components from wasting water.

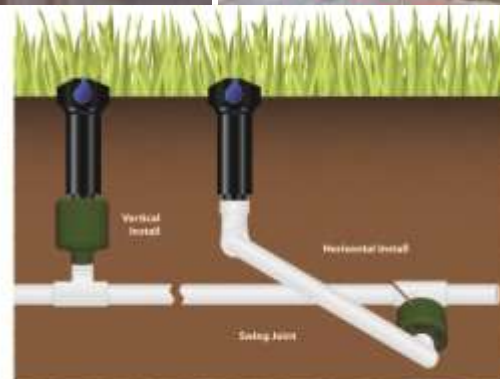

Features:

1. Automatically shuts-off water to damaged parts.
2. Never needs replacing: install it and forget it.
3. Installs vertically, horizontally, or at any angle.

Benefits: Save Water When Sprinklers Break

1. Conserves thousands of gallons each and every year.
2. **Lowers watering bills as much as 35%.**
3. Eliminates the loss of zone pressure from damage.
4. Allows all good sprinklers to water normally
5. Reliable defense against vandalism and undiscovered system damage.
6. Ensures compliance with state and municipal conservation code.
7. Eliminate the risk of violations and fines from broken sprinklers.
8. Works perfect with swing joints, funny pipe and in difficult areas or terrain.

Facts and Specifications:

- Completely stops flow when activated.
 - 1/2-inch unit shuts-off at 6 GPM (+/- 0.25)
 - 3/4-inch unit shuts-off at 12 GPM (+/- 0.25)
- Auto reset to normal when damage repaired.
- Installs vertically, horizontally, or at any angle.
- Max Pressure: 550 PSI
- Pressure Loss: 0.01 PSI per unit (+/- 0.01)
- Flow Loss: 0.1 GPM per unit (+/- 0.1)
- Uses NPT threading standard
- Installed Dimensions: 2" x 2"
 - Adds 2 inches to riser if installed vertically
- 100% compatible with:
 - Compressed air blow-out procedures
 - Non-potable and fertilizer systems
- No Spare Parts Needed, Ever!
- 5-Year Warranty
