

GEISERMISER

Save Water When Sprinklers Break

How to Sell the GeiserMiser®

The Problem:

When sprinklers break, hundreds (and often thousands) of gallons of water are senselessly wasted. Further, expensive erosion, flood damage, and municipal fines easily follow.

The Solution:

GeiserMiser, and its patented FlowHalt™ technology, saves water when sprinklers break; it's like insurance that saves our water and protects against expensive and unplanned property damage.

By automatically shutting off water to damaged sprinklers, the GeiserMiser reliably eliminates senseless water waste, and prevents expensive erosion, flood damage, and code violations. Additionally, GeiserMiser also preserves zone pressure, and keeps good sprinklers watering normally!

Existing Installs: It's an easy Up-Sell during Repair and Upgrade Visits.

New Installs & Extensions: It's an easy Up-Sell for sprinklers in high-traffic zones.

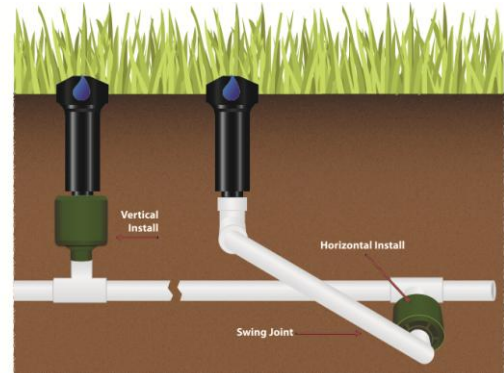

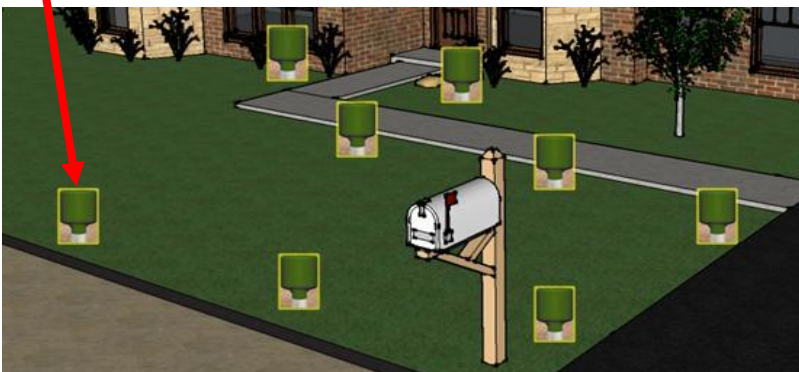

Installers and Contractors

Easily boost sales by offering GeiserMiser during repair calls, and for new installs along sidewalks, streets, driveways and other high-traffic areas.

Property Owners

Ask that GeiserMiser be installed along your sidewalks, streets and driveways. Rest-assured that you've eliminated this embarrassing, wasteful, and costly flooding problem!

Example: Install along "hardscapes" to stop water waste, erosion & flood damage, violations, and preserve zone pressure!
